

POE switch

A PoE, if it is connected to several cameras, will allow to draw **only one cable** between it and the storage unit (be careful, it does not allow to add channels to the storage unit). In addition, **it extends the possible distance between the camera and the storage device**: where normally it is limited to 100m, **a switch can increase it by 100 or 250m** and benefit from a star connection.

Reference	POE04	POE08	POE16	POE04LD
Number of ports	5	10	18	5
Number of camera ports	4 (10 - 100Mbps)	8 (10 - 100Mbps)	16 (10 - 100Mbps)	4 (10 - 100Mbps)
Uplink port	1 (10 - 100Mbps)	2 (1000Mbps)	2 (1000Mbps)	1 (10 - 100Mbps)
Max distance	100m	100m	250m	250m
Type of PoE	POE+	POE+	POE+	POE+
Power supply	240V, 60W	240V, 120W	240V, 200W	240V, 60W
Size	140mm x 91mm x 28mm, 0.9kg	82 x 178 x 44 mm, 1.4kg	310mm x 180mm x 44.5mm, 1.9kg	92 mm x 82 mm x 22 mm, 0.9 kg
